## CALL FOR PAPERS IN SESSIONS

**1** Modern Production and Postharvest Handling of Raw Material

**2** Chemical Food Analyses in the Supply Chain

**3** Food Processing with respect to Product Quality and Safety

**4** Emerging Technologies in Food Processing

**5** Monitoring Technologies for in-situ Analyses in Bioprocesses

**6** Modelling as a Tool for Process Management

## 5<sup>th</sup> International Technical Symposium on Food Processing, Monitoring Technology in Bioprocesses and Food Quality Management

Aug 31<sup>st</sup> to Sept 2<sup>nd</sup>, 2009  
Potsdam, Germany

5<sup>th</sup> CIGR  
International

Section VI  
Symposium

Organized by ATB and  
CIGR Section VI

Sponsored by

The CIGR (International Commission of Agricultural Engineering) Section VI (Postharvest Technology and Process Engineering) deals with the engineering principles and technologies in postharvest and processing of agri-food products. It is devoted to follow the trends, promote the advancement and enhance the dissemination and transfer of technology in postharvest and processing at a global scale.

In order to fulfil better its missions, the CIGR Section VI is organizing the 5<sup>th</sup> International Technical Symposium on Food Processing, Monitoring Technology in Bioprocesses and Food Quality Management in Potsdam, Germany in 2009.

The event follows the successful 1<sup>st</sup> International Symposium on Bioproducts Processing and Food Safety held in Beijing in October 2004, the 2<sup>nd</sup> International Symposium on Future of Food Engineering in Warsaw in April 2006, the 3<sup>rd</sup> International Symposium on Food and Agricultural Products: Processing and Innovations in Naples in September 2007, and the 4<sup>th</sup> International Symposium on Food and Bioprocess Technology in Foz do Iguaçu, Brazil.

As previous Symposia, selected papers presented at this Symposium will be published in a special issue of *Food and Bioprocess Technology – An International Journal* published by Springer.
